Exhaust Insulation

LAVA™ EXHAUST WRAP

The original exhaust wrap made from basalt fiber (crushed volcanic rock), Heatshield Products Lava™ Wrap. Not only did we lead the way in the fiber, but we also designed the knit. You have seen many knock offs, but this is the original lava rock wrap. Lava Wrap has the same benefits as exhaust wrap, but with a carbon-fiber appearance and improved durability. This exhaust wrap is 25 percent stronger than fiberglass wraps, giving it prolonged life.

Using Lava™ Wrap on a header and exhaust system maintains hotter exhaust gases, decreases gas density and allows the exhaust gases to flow through the system at increased velocities. Greater exhaust scavenging is produced, pulling intake gases through the cycle faster, helping to lower air-intake temperatures. This results in more horsepower and reduces radiant heat damage. Lava Wrap™ lowers exhaust realted under-hood temperatures by as much as 50%.

Heatshield Products Lava™ Wrap withstands continuous temperatures of 1200°F and intermittent 2000°F. Please note this is a real-world-tested rating, so beware of inflated temperature ratings of similar basalt/volcanic rock products.

Installation is easy: Wrap it around your exhaust pipe, using overlap to hold it in place (like a hockey stick or tennis racket grip) and use our Thermal-Tie™, hose clamps or wire products to secure the ends in place.

FEATURES:

- **1200°F** CONTINUOUS **2000°F** INTERMITTENT
- 25% stronger than fiberglass wraps
- Reduces underhood temperatures up to 50%
- Special weave makes it easier to wrap around bends
- Carbon-fiber appearance

PART NO.	DESCRIPTION
371025	1 in x 25 ft
371050	1 in x 50 ft
372005	2 in x 15 ft
372025	2 in x 25 ft
372026	2 in x 25 ft, w/ 4 ties
372050	2 in x 50 ft
372051	2 in x 50 ft, w/ 10 ties
372100	2 in x 100 ft
372400	4 in x 100 ft
